GEOGRAPHY Scheme of Work 2023 to 2024: Year 7

AUTUMN TERM 1: SEPTEMBER - OCTOBER	AUTUMN TERM 2: OCTOBER - DECEMBER	WINTER TERM 1: JANUARY - FEBRUARY
'What a Wonderful World'	Map Skills	Rainforests
AO: To understand the world we live in	AO: To interpret maps on a variety of scales.	AO: To understand the role rainforests play and why they are essential to life on Earth.
Pupils will examine the three different types of geography and how it can help us understand the world around us.	Pupils will examine a variety of maps and build the skills needed to read and understand these maps.	Pupils will examine the physical features and benefits provided by rainforests, with particular focus on the
Topics include:	Topics include:	Amazon.
Introduction to physical, human and and environmenta		Topics include:
geography	The UK on a map	Tropical and temperate rainforests
Atlas skills	Compass points	Layers of the rainforest
Capital Cities	Map symbols	
Wonders of the World	4 and 6 Figure Grid references	Deforestation and it's link to climate change
Main tout Progress in Cooperation Kou Stage 3 HODDED	Scale and distance	How to save the rainforest
Main text: Progress in Geography, Key Stage 3, HODDER EDUCATION	Latitude and Longitude	Sustainable tourism to the rainforest
	Main text: Progress in Geography, Key Stage 3, HODDER EDUCATION	Main text: Progress in Geography, Key Stage 3, HODDER EDUCATION
WINTER TERM 2: FEBRUARY - MARCH	SPRING TERM 1: APRIL - MAY	SPRING TERM 2: JUNE - JULY
Settlement	Natural Hazards	Knowledge Consolidation
AO: To learn how settlements grow and change over time.	AO: To describe and explain the causes and consequences of	AO: To consolidate our knowledge from this academic
	Natural Hazards	year
Pupils will examine different locations along with the growth and	Natural Hazards	year

Topics include:	Natural Hazards Pupils will examine the processes associated with the physical environment and some of the most prominent challenges that we face globally. Pupils will develop their abilities to analyse and predict future events, as well as manage and mitigate their effects to support communities when they need it most. Topics include:	year Pupils will use different revision techniques to consolidate their knowledge from the year. This will give them a chance to highlight any misconceptions they may have and trial different forms of revision in preparation for future assessments. Topics include:
Pupils will examine different locations along with the growth and nature of settlements. They will compare settlements from differen locations around the world and their local area and then identify the patterns they can find in these settlements. Topics include: Settlement functions	Natural Hazards Pupils will examine the processes associated with the physical environment and some of the most prominent challenges that we face globally. Pupils will develop their abilities to analyse and predict future events, as well as manage and mitigate their effects to support communities when they need it most. Topics include: Plate tectonics	year Pupils will use different revision techniques to consolidate their knowledge from the year. This will give them a chance to highlight any misconceptions they may have and trial different forms of revision in preparation for future assessments. Topics include: Cornell Method of Notetaking
Pupils will examine different locations along with the growth and nature of settlements. They will compare settlements from differen locations around the world and their local area and then identify the patterns they can find in these settlements. Topics include: Settlement functions Site, situation and settlement patterns	Natural Hazards Pupils will examine the processes associated with the physical environment and some of the most prominent challenges that we face globally. Pupils will develop their abilities to analyse and predict future events, as well as manage and mitigate their effects to support communities when they need it most. Topics include: Plate tectonics Earthquakes	year Pupils will use different revision techniques to consolidate their knowledge from the year. This will give them a chance to highlight any misconceptions they may have and trial different forms of revision in preparation for future assessments. Topics include: Cornell Method of Notetaking Mind maps
Pupils will examine different locations along with the growth and nature of settlements. They will compare settlements from differen locations around the world and their local area and then identify the patterns they can find in these settlements. Topics include: Settlement functions Site, situation and settlement patterns Why settlements change	Natural Hazards Pupils will examine the processes associated with the physical environment and some of the most prominent challenges that we face globally. Pupils will develop their abilities to analyse and predict future events, as well as manage and mitigate their effects to support communities when they need it most. Topics include: Plate tectonics Earthquakes Volcanoes	year Pupils will use different revision techniques to consolidate their knowledge from the year. This will give them a chance to highlight any misconceptions they may have and trial different forms of revision in preparation for future assessments. Topics include: Cornell Method of Notetaking Mind maps Posters
Pupils will examine different locations along with the growth and nature of settlements. They will compare settlements from different locations around the world and their local area and then identify the patterns they can find in these settlements. Topics include: Settlement functions Site, situation and settlement patterns Why settlements change Changes in retail	Natural Hazards Pupils will examine the processes associated with the physical environment and some of the most prominent challenges that we face globally. Pupils will develop their abilities to analyse and predict future events, as well as manage and mitigate their effects to support communities when they need it most. Topics include: Plate tectonics Earthquakes Volcanoes Tsunamis	Pupils will use different revision techniques to consolidate their knowledge from the year. This will give them a chance to highlight any misconceptions they may have and trial different forms of revision in preparation for future assessments. Topics include: Cornell Method of Notetaking Mind maps Posters Timelines
Pupils will examine different locations along with the growth and nature of settlements. They will compare settlements from different locations around the world and their local area and then identify the patterns they can find in these settlements. Topics include: Settlement functions Site, situation and settlement patterns Why settlements change Changes in retail Brazil Brownfield vs Greenfield sites	Natural Hazards Pupils will examine the processes associated with the physical environment and some of the most prominent challenges that we face globally. Pupils will develop their abilities to analyse and predict future events, as well as manage and mitigate their effects to support communities when they need it most. Topics include: Plate tectonics Earthquakes Volcanoes Tsunamis Hurricanes	Pupils will use different revision techniques to consolidate their knowledge from the year. This will give them a chance to highlight any misconceptions they may have and trial different forms of revision in preparation for future assessments. Topics include: Cornell Method of Notetaking Mind maps Posters
